

Email received about speeding on High St

From my vantage point here on the High Street the 20 mph limit is seldom adhered to. The average speed of most vehicles is 35 –40 mph, with some late night traffic exceeding 50 mph! Unless the limit is enforced either with a camera or speed bumps someone is going to be injured or cars/property damaged. The Parish Council have successfully applied to have yellow lines installed but this will only encourage more speeding, so please consider some action to slow the traffic.
